CHAIRMAN, PRESIDENT'S FOREIGN INTELLIGENCE ADVISORY BOARD

SUBJECT:

Distribution of NSSD 2 Study: Capabilities Against the Hostile Intelligence Threat, 1983-1988 (5)

In National Security Study Directive 2-82, Detecting, Analyzing, and Countering the Foreign Intelligence Threat to the United States, the President directed a review of US capabilities for detecting, analyzing, and countering foreign intelligence activities directed against the US and its interests. The first major step in this review, "Capabilities Against the Hostile Intelligence Threat, 1983-1988," is now complete. The DCI has forwarded it to the President following review by the Senior Interagency Group-Intelligence (SIG-I).

This detailed comprehensive study drawing upon the annual hostile intelligence multidisciplinary threat assessment summarizes that threat and reviews our capabilities to counter it. The study recommends a number of US counterintelligence, other countermeasures, and protective security activities enhancements. The study is forwarded for your active use as a planning document for program and budget development. Also attached is a copy of the DCI's letter to the President.

The study will become the basis for a series of actions in the program and budget as well as policy areas, and I urge you to make full use of it in your efforts to meet the significant threat to our security posed by hostile intelligence activities. The DCI is developing a detailed action plan to be considered by the SIG-I in September.

As the President directed in NSSD 2, the recommendations contained in the annual multidisciplinary assessments should also be considered by the SIG-I in this process. I would also remind you of the extreme sensitivity of this capability and enhancements review and ask that you give particular attention to carefully controlling these documents.

William P. Clark
